

Our Lady of Grace School During and After the School Day

Our fifth grade class is involved in a Literature Circle. Once a week the class breaks up into two groups one group goes to library for their weekly class. The other group stays in the classroom and works with a trained volunteer. Their discussion deals with the current novel that they are reading outside of the classroom. This program is well liked by students and the volunteers alike. They love the books and the interaction that happens each week between the classmates. Relating the text of a book to one's own life is an important skill to learn to do. Great job!

Our kindergarten, first, and second grade students signed up for an after school enrichment program: Kinderkicks. The students work on their soccer techniques and skills. It is always fun to run around and play in the big field with other students on a fall afternoon.

Some of our students in the sixth, seventh, and eighth grades worked in baking. They worked with partners and created muffins, pastry, and cookies for the four weeks of Fun With Baking. The smells and the sound of children enjoying themselves filled the air during the time they spent in the kitchen. Yummy! This course is offered to each grade level at some time during the year.
