

**Some Young Ladies from Our Lady of Grace School
Attend
Science Day
At
Seton Keough High School**

Mrs. Beck, our Middle School science teacher, accompanied some seventh and eighth grade girls to the Science Day at Seton Keough High School on October 12th. Class participation and science grades were the determining factors used to choose who would be allowed to attend this event. The seventh graders were Ruth Beck., Catherine Keirn, Lilly Rothman, Marisa Talerico, and Ella Tankersley. The eighth grade girls were Jen Bienert, Laura Dobbyn, Colleen Campbell, Emily Causey, Kathleen Skiba, and Corey Fletcher.

Seton Keough set up activities that covered different science areas. They had Engineering Robotics, Biology: DNA Extractions, Physics: Toppling Towers, Chemistry: Chromatography, Biomedical Science: Monitoring Vital Signs, and Forensic Science: Fingerprint Analysis.

The team had a wonderful time experiencing innovative, thought provoking, hands-on activities in six different subjects. Our young ladies represented our school with excellent participation, well mannered behavior, and high motivation. We are very proud to have each of these young ladies be able to attend this fine event.

Well done girls!
